

Rolling masters
SINCE 1822

***‘There are
many ways of
making paper,
but only one
way to do it
right’***

This is what you could read on a sign above the entrance to the first factory. Years later this motto was taken off the wall, but it was imprinted on the memory of each one of OCB’s employees.

In order to make our paper and achieve excellent results, we need top quality raw materials, the latest technology and a rigorous control throughout the entire process. This is the true goal of a Rolling Master.

THE SMARTEST TREND.

There are several factors that have changed tobacco consumption trends over the past few years. The main reason is the cost. It's obvious that rolling tobacco is ***more economical***, but there are also other important reasons that make it advantageous.

One of these reasons is that it gives consumers ***more freedom*** as they are able to roll their own personalised cigarettes. Consumers can now choose the type of tobacco and paper according to the flavour and aroma, and, if they wish, they can also choose more natural options like organic unbleached hemp papers.

We can, therefore, confirm that rolling tobacco is no longer stigmatised and is now seen as the ***smartest and most current way of smoking***.

***'the smartest
and most
current way of
smoking'***

OCB PREMIUM

—
This paper has made OCB's prestige. The top rolling paper for any Rolling Master. Very fine and transparent, and easy to recognise thanks to its distinctive hologram and stylish new design.

DATAMATRIX technology

WE PROTECT OUR BRAND TO PROTECT YOUR BUSINESS.

At OCB, we keep on innovating to ensure that customers buying our products get the quality they seek. To support this, we have introduced DATAMATRIX technology to our booklets. Thanks to this innovation, we can assign each of our booklets a unique code that identifies it as AUTHENTIC, respecting the highest quality standards and protecting us from counterfeiting.

WE ENSURE THAT OUR QUALITY IS UNRIVALLED

Quality has been an intrinsic part of our brand from the beginning and we are committed to preserving the unrivalled quality of our brand. We are an iconic brand. We have more than 20 years' expertise in the RYO market and we are market leaders.

WE ENSURE THAT OUR DESIGN IS PROTECTED

We have implemented the DATAMATRIX code on all OCB booklets. Printed on each of our booklets, is a code which we can check to establish the details of manufacture, the product number and a unique serial number. By scanning this code with a mobile app, it is easy to check that your booklet is genuine. That it is proudly made by OCB, respecting the highest standards of quality and delivers the smoking satisfaction that you are looking for.

WE ENSURE THAT OUR INNOVATION IS UNRIVALLED

Innovation is our DNA. We led the way when we created our organic hemp paper range. We were the first to launch the lightest and thinnest paper, OCB Ultimate. We are committed to being «at the cutting edge of innovation» with OCB, whilst ensuring we preserve our brand quality at all costs.
